

What Can I Do With a Degree in NURSING

Nursing prepares individuals to integrate principles from the humanities with the natural, biological, and behavioral sciences into practice in nursing or related fields. Nursing graduates assist clients as they adapt to a variety of situations of health and illness occurring throughout the life cycle. Alternatively, some graduates apply their experience in areas that require analytical, problem-solving, and organizational skills.

Skills Associated With Nursing Majors

Propensity for analytical, clinical, communication, organizational, and research skills
 Leadership and management ability
 Ability to influence, persuade, motivate and empower
 Evaluate data and results and summarize findings
 Maintain precision and accuracy; attention to detail
